***Response to Arguments***

1. Applicant's arguments, filed 9/12/07, with respect to claims 1-3 and 5-7 have been fully considered and are persuasive. The rejection of these claims has been withdrawn.

***Allowable Subject Matter***

1. The following is a statement of reasons for the indication of allowable subject matter:

**Claims 1-3 and 5-7 are allowed.**

Claims 1-3 and 5-7 are directed towards a phone alert system comprising a cell phone with a transceiver, a speaker and means of attaching the phone to a person's clothing. Further the invention discloses a mechanism attached to the receiver unit, the mechanism including a plurality of notification settings, the mechanism allowing an individual to alternately choose one of the plurality of notification settings at any particular time, each notification setting designed to correlate with a particular notification mechanism, wherein the mechanism attached to the receiver unit is a three-position switch, the three- position switch having three separate positions, one of the positions being a "beep mode," another one of the positions being a "light mode," and the third position being a "vibrate mode," each of the three positions corresponding to a notification mechanism of the receiver unit,

The prior art references individually or in combination fail to render the above underlined unique feature obvious.

Therefore claims 1-3 and 5-7 are allowed.
